

## Census Document Recall

Richard G. Davis, Acting Superintendent of Documents has been advised by the U.S. Census Bureau that some Census Bureau publications sent to depository libraries from 1992 to 1998 should not have been distributed. These materials were intended for internal use only, for field agent testing. Public access to these documents could compromise the integrity of the Census' program for field agent testing. For that reason the publications are considered to be sensitive. Therefore the Superintendent of Documents is requesting that depository libraries withdraw these publications from library collections. Descriptive information on these titles is shown below.
